Cognitive Testing

Due to an exceptionally high demand for cognition and learning assessments, we are unfortunately no longer able to accept parent requests for these assessments through school.

If you have concerns that your child may be displaying traits associated with Dyslexia, you may wish to seek a private assessment. Information about qualified assessors and specialist tutors can be found via PATOSS:
https://www.patoss-dyslexia.org/tutor-index-landing

If your concerns relate to your child's visual processing or visual difficulties, please be aware that these are separate from Dyslexia and should be explored with an Optometrist. In all cases, we recommend consulting an Optometrist of your choice for advice and assessment.

Please note that an Optician's role is primarily to dispense glasses and contact lenses, whereas an Optometrist is qualified to assess and investigate visual difficulties and visual processing concerns.
