

## **INSTRUCTIONS TO HELP STUDENTS ACCESS DODDLE THROUGH APPLE DEVICES AND SOME ANDROID TABLETS**

If you are using a **Mac desktop or Macbook** then make sure you enable flash for individual websites. You may need to update your flash but this is a fairly simple process.

For students with **iPads or iPhones** you need to install the Citrix workspace app from the Appstore. You will then be able to login to the school system and work on Doddle through internet explorer or chrome.

- 1 Download the app from the Appstore
- 2 Choose whether to allow or do not allow notifications
- 3 Press get started
- 4 Type in your **p number, email address** and **press continue**
- 5 The next screen: type in your **p number** and **password**
- 6 The next screen gives you the option to use **Touch ID** which makes the login process much simpler.

For students with **Android tablets** you can download for free the Puffin Web Browser. [Click here](#) to take you to the link.
