Lord Grey Students Outperform Peers in Health and Social Care

Lord Grey Sixth Form A-Level students have achieved excellent results and gained good 'Value Added' scores compared to other schools. In 2017 we finished in **SEVENTH position in the national performance tables** for the Health and Social Care Level 3 course.

Our students worked exceptionally hard for their grades; tutors and teachers went that extra mile to make sure they achieved at the very top end, to gain entry to the university of their choice. We are extremely proud of them all.

"To see Lord Grey in the top 7 across all of England for Health and Social Care at Level 3 is brilliant. I felt so proud when I saw this. Well done to all involved." **Principal**

"Our students have historically performed extremely well on the Level 3 Health and Social Care courses, aided by some superb targeted and positive support from our very professional staff. We have consistently seen positive Value Added scores, but to see this top performance at a national level is very inspirational for the students and staff at Lord Grey Sixth Form and is a great example to younger students in the Academy." **Head of Sixth Form**

"The grades are a credit to the hard work the students put in over the two years. Their dedication and commitment to achieving the best grades they possibly could, coupled with targeted individual support from staff, enabled them to succeed in a positive and aspirational learning environment. I am proud of the positive reputation that this subject has with students, staff and parents and I look forward to more students flourishing in this area in the future." **Head of Wellbeing Faculty**
